C1 - short staff mobility for training aim - day 2

The second day of our meeting was definitely much more intensive and full of work.

The biggest part of agenda for today was focused on the NEET youth generation. We discussed NEET phenomena and tried to find similarities in European context, as we come from different countries and cultures and the model of NEET might be different in each country.

Afterwards, participants were divided into small groups of two - each group was from the same country - and started to work on defining a typical NEET in order to find the best solutions that should be used in the game, that we are to create within this project.
