### C1 - short staff mobility for training aim - day 3

**The third day started with study visit in local NGO - Association "ECHO".**

Association "ECHO" was established in 2002 on the initiative of Hanna Hendrysiak. The period of the 90s was for the current president of the Association remembered not only because of the poverty that touched her, but also the people who then reached out to her to help her. This experience meant that she decided to help others & herself. She started with being a volunteer, but in 2002 together with other people who wanted to help, she founded Association "ECHO".

We had an opportunity to learn about the activities that they led as well as problems that they faced in their daily work. The president of the Association showed us the building and room where young people gather to spend time actively and safely. The last part of the study visit included us playing games with youth from the Association.

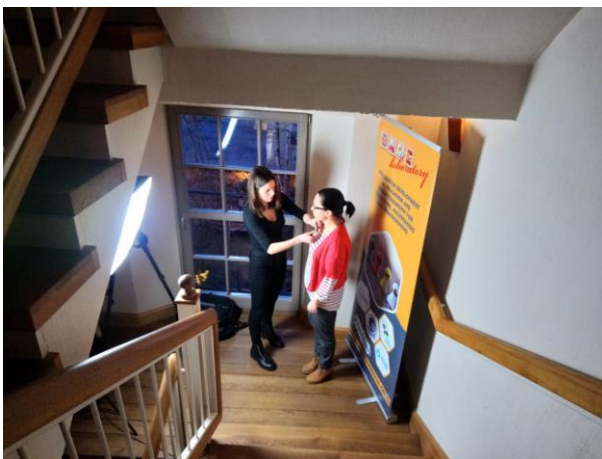

After lunch we took part in a presentation provided by a career counsellor and president of Fundacja Centrum Aktywności Twórczej. The presentation was dedicated to recommendations on NEET phenomena in Poland.

The last part of the day was more technical - participants discussed content of the Intellectual Outputs, divided responsibilities and set deadlines.

Meanwhile our camera operators recorded some interviews for the video that will be presented at the dissemination conferences! :)
