Transnational Project Meeting - Day 3

The third and the last day was spent mostly on testing the games.

After the short presentation delivered by the hosting organization, we started testing board games in order to learn some good practices and choose some good tools and mechanics that we can use in our future game, which is the Intellectual Output 3 from the Game Laboratory Project. As the hosting organization has a wide range of board games we could take a look at a vast variety of games.

Each partner recommended some tools that might be used in our game. We finished the meeting with an evaluation and after this we had a farewell lunch. Each participant received a certificate of attendance. Now it's time to go back to our countries and start preparing the next activities & training courses. We are looking forward to seeing you again!
